Maximum Number of Team Members	4	
Number of Team Members Scored	3	
Scantron	Horticulture – CDE# 105482	
<b>Committee:</b> Tyler Butts Mary Phillips Lisa Moreland Steve Tennant John Workman		

The contests will consist of identifying correctly from specimens, **twenty-five (25) to thirty (30)** common economic insects or insect relatives which will be selected from the following list. Specimens will be numbered and contestants will identify the common name, host, scientific order and ONE control measure for each insect. Students will select the appropriate corresponding number for each insect, host, scientific order and control measure from the lists provided and enter those appropriate numbers on the scantron sheet provided.

#### THE SCORE WILL BE DETERMINED AS FOLLOWS:

1. Each correctly identified **insect** or **insect relative** will count **3 points**.
2. Each correctly identified **order** will count **1 point**.
3. Each correctly identified **host** will count **1 point**
4. Correctly identifying one of the **control measures** for each will count **3 points**

Bulletins illustrating and describing economic insects or their relatives are occasionally issued by the Agricultural Experiment Stations of various states-- usually the supply of these bulletins is so quickly exhausted that their listing here is not worthwhile.
